

Product Name: Freezone Big Smoke Insecticide
APVMA Approval No: 85393/113179

Label Name:	Freezone Big Smoke Insecticide
Signal Headings:	CAUTION KEEP OUT OF REACH OF CHILDREN READ SAFETY DIRECTIONS BEFORE OPENING OR USING
Constituent Statements:	Active Constituent : 135 g/kg PERMETHRIN (25:75) Also Contains: 127 g/kg POTASSIUM CHLORATE
Mode of Action:	GROUP 3A INSECTICIDE
Statement of Claims:	For the control of Ants, Flies, Fleas, Silverfish, American and German Cockroaches, Weevils, Spiders, Caterpillars, Aphids as specified in the Directions for Use.
Net Contents:	31 g
Restrains:	
Directions for Use:	This section contains file attachment.
Other Limitations:	
Withholding Periods:	
Trade Advice:	

General Instructions:	<p>GENERAL INSTRUCTIONS</p> <p>Remove people, animals, fish and birds from area to be treated. For best results, ignite the generator late in the evening and leave area closed overnight. Place the generator on a fireproof base at least 700 mm in diameter, on a protective floor covering or in a metal bucket. To ignite, remove plastic cap from canister and, using a match, light exposed fuse. Always ignite those generators furthest away, lighting those nearest your exit last. Leave immediately after lighting smoke generators. The generator will burn for approximately 30-45 seconds, however keep area airtight for at least 3 hours after lighting. Ventilate for 30 minutes before re-entry.</p>
-----------------------	--

Resistance Warning:	<p>For insecticide resistance management, Freezone BIG SMOKE INSECTICIDE is a Group 3A insecticide. Some naturally occurring insect biotypes resistant to Freezone BIG SMOKE INSECTICIDE and other Group 3A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Freezone BIG SMOKE INSECTICIDE or other Group 3A insecticides are used repeatedly. The effectiveness of Freezone BIG SMOKE INSECTICIDE on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, Freezone Public Health Pty Ltd accepts no liability for any losses that may result from the failure of Freezone BIG SMOKE INSECTICIDE to control insects. Freezone BIG SMOKE INSECTICIDE may be subject to specific resistance management strategies. For further information contact your local supplier, Freezone Public Health Pty Ltd representative or local agricultural department agronomist.</p>

Precautions:	<p>PRECAUTIONS:</p> <p>DO NOT use in premises when food producing animals are present. Remove or cover exposed food, food utensils, food processing areas, pet bowls and fish tanks. Aerators should be turned off while the product is in use and while the aquarium is covered. DO NOT apply where smoke detectors are operating. Remove all RAYON and SILK fabrics (clothing, curtains, drapes, etc) from the area to be treated as discolouration may result.</p>
--------------	--

Protections:	<p>PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT</p> <p>Extremely dangerous to fish. Fish tanks and aquariums should be removed or covered prior to use of this product. DO NOT contaminate streams, rivers or waterways with the chemical or used containers.</p>
--------------	---

Storage and Disposal:	<p>Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Dispose of used smoke generator safely, wrap empty generator in paper and place in waste bin. DO NOT re-use.</p>
-----------------------	--

Safety Directions:	<p>DO NOT inhale vapour. Leave immediately after lighting smoke generators. Thoroughly ventilate treated areas before re-occupying.</p>
--------------------	---

First Aid Instructions:	<p>If poisoning occurs, contact a doctor or Poisons Information Centre Phone Australia 13 11 26.</p>
